

NEWS AND EVENTS

Dan Herndon, formerly with Texas Molecular, has joined Soltex as Operations Manager. Dan brings 30+ years of experience in Plant Design and Operations. dherndon@soltexinc.com

Terri Schaefer recently joined the Soltex team as Customer Service Lead. Terri has 25 years of diverse experience in the chemical industry with ExxonMobil Chemical Company and Shell Lubricants. We welcome Terri to the Soltex family. tschaefer@soltexinc.com

PARTNERS IN TRADE

We are pleased to announce Soltex's alliance with Nynas for marketing Type I and Type II transformer oil. Our expertise in the dielectric fluid business makes this a natural partnership as their official US distributor for these high quality products.

In addition, Soltex will be offering the Nynas BNS series of severely hydro-treated naphthenic base oils, which are excellent bright stock replacements.

For further information about either product line, please contact Susan Kovacs at skovacs@soltexinc.com or via cell phone at 973-610-3346.

DEPARTMENT FOCUS

Soltex has strengthened the Technical and Operations team to support efforts in upgrading the current product line and bringing new products to the market. John Powers, formerly with ChemTech Labs, has joined the Soltex Technical team and will be working with Ed Baxter to accelerate R&D efforts. Together they will prepare new technical blends, synthesize new products for evaluation, and look at ways to upgrade existing Soltex products into higher value derivatives.

PRODUCT SPOTLIGHT

TACKIFIERS - In May Soltex signed an agreement with OMG to be their exclusive global sales and marketing agent for their line of polymer based tackifiers. Three basic grades available are:

- 1) Soltex OMG Tackifier E858 - General grade suitable for most applications.
- 2) Soltex OMG Tackifier E857 - Water white version for use in applications where color is important.
- 3) Soltex OMG Tackifier E859 Food Grade - Approved by NSF for incidental food contact.

Main applications for these products are bar and chain oil, greases, way lubricants, and applications where additional adhesion is required. Data sheets and MSDSs are available on our website.

We look forward to discussing these products with you and to working closely with existing customers during this transition. If you have any questions please contact Bill Wahl at wwahl@soltexinc.com, or 216-577-1318.

Thanks Transflo!

Many thanks to all the wonderful folks at Transflo and Savage Services in Elizabeth, NJ for the great job you always do on our dielectric fluid projects. You go above and beyond. Special thanks to Willie Leach, Dwayne Brookins, Geovanny Velez, James Dowdy, Roscoe Parks, Kenneth Bellinger, Terri Bradley, Michael Calderon, Rachel Arroyo and Henry Fajardo. You are the best!
